

Quantum User Exchange (QUE) Group Announces 11th Annual Conference, Elects New Board of Directors

SAN DIEGO, CALIFORNIA, March 7, 2016 – The Quantum User Exchange (QUE) Group announced today its [11th Annual QUE Group](#) conference will be held July 27 - 30, 2016 in San Diego, California. The two-day conference features an exciting, new venue at the Hard Rock Hotel, San Diego near the San Diego International Airport, Component Control headquarters, and located in the historical Gaslamp Quarter, famed for its festivals and nightlife. To meet the event's high demand, the group's Board of Directors has opened additional space this year, accommodating up to 300 guests.

"Last year, we broke attendance records again. We want to ensure as many people as possible can take advantage of the conference's focused learning and networking opportunities," said Tara Knapp, QUE Group President and Business Process Architect at Avmax Aviation Services. "The conference is all about sharing knowledge and collaborating with the software's developers. Learning on this level benefits companies significantly in terms of productivity and profits."

QUE Group members are invited to attend, and will receive free QUE Group membership for the next year with their paid admission to this year's conference. Special early bird pricing is available until March 31. Registration includes access to all training workshops, software demonstrations, seminars, roundtable discussions and special events.

The independent, non-profit QUE Group is a go-to resource for users of Quantum Control MRO and Logistics Software developed by Component Control for the aviation industry. The group's annual conference helps users master the software, learn tips and best practices, and provide feedback to the software's engineers and support teams. Attendees also hear about future Quantum Control upgrades, including expected features, functionality and release dates.

As in past years, the annual event will highlight real-world challenges and solutions. Presenters include aviation executives and experts who use Quantum Control to efficiently manage all aspects of business,

industry specialists from the U.S. Government as well as Component Control staff. The conference explores a variety of subjects such as streamlining warehouse processes, complying with regulatory requirements, using social media to grow online sales, and getting the most out of automation tools.

QUE Group recently elected a new Board of Directors, whose responsibilities include moderating the forums on the QUE Group website as well as organizing the conference.

About QUE Group

The QUE Group is a user-managed, non-profit corporation that is independent from Component Control, and supported by a membership website and online community. Built to facilitate networking and information sharing across companies that use Quantum Control™ software, The QUE Group is governed by a Board of Directors comprised of elected members of the community. For more information or to become a member visit the [QUE Group website](#).

About Component Control

Component Control, based in San Diego, California, is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry. Its core product, Quantum Control, provides advanced aviation management support to original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution/redistribution companies. Quantum is installed in more than 50 countries and can be deployed as a single-site or multinational solution.

Stockmarket.aero, also from Component Control, is an online aviation parts trading marketplace giving users access to a comprehensive search engine that includes parts in stock, MRO capabilities and part alternatives. StockMarket.aero currently lists more than 100 million qualified line items of inventory and capability from over 3,000 aircraft parts vendors.

Component Control won the 'Best IT Software Provider' category in the Aircraft Technology Engineering and Maintenance Awards.
