

## **Quantum Control User Group, QUE Group, Continues to break attendance records at its 10th Annual Conference in San Diego**

SAN DIEGO, CA, August 26, 2015 – Quantum User Exchange Group, or [The QUE Group](#), recently wrapped up its [10th Annual Quantum Users Exchange Group conference](#) held in San Diego, CA. As in past years, conference attendance grew significantly; breaking records again as companies realize that focused learning and expert knowledge expands employee skills and helps companies earn a greater ROI on Component Control's Quantum Control software. This year's conference provided presentations and learning experiences focused on the evolving challenges aviation businesses face in both local, and global markets, and across the enterprise - from accounting to procurement, to inventory management and shop floor operations.

"Ten years ago the QUE Group conference started as a small gathering of companies at the Component Control San Diego headquarters with the intention of sharing knowledge, learning from each other and collaborating with Component Control to improve the product for all users," said Paul Stewart, QUE Group President, Chief Technology Officer at [Worthington Aviation](#), and presenter at the conference. "Today, we have users attending the conference from seven or more countries representing every major sector of the Aviation Aftermarket Business. Having elevated the conference to include collaboration with major industry associations such as the [Aviation Suppliers Association](#) (ASA) and the [Aeronautical Repair Station Association](#) (ARSA), the core mission remains intact to make aviation business run better through shared user knowledge. It is apparent the return on investment to attend this conference is significant, and this is demonstrated year over year through the expanded attendance, broader speaker base and overwhelming positive feedback. Here's to another successful year for the QUE Group. Happy Tenth Anniversary." Images from the event are available for viewing on the [Component Control FaceBook](#) page.

The QUE Group is a nonprofit, independent company representing the Quantum Control Software user community, with over 300 registered members. The QUE Group is governed by an elected [Board of Directors](#) from within the user community on an annual basis. This volunteer board directs the activities of the group throughout the year, and the coordination of the annual conference.

Both members and non-members of QUE Group are encouraged to attend the conference to enrich the diversity of the learning experience. The QUE Group board, which manages the conference program,

consists of technical and business executives from leading aviation service companies such as Embraer, Ansett Aircraft Spares & Services, Worthington Aviation, Rockwell Collins, Epps Aviation and more.

[Quantum Control](#) is a fully integrated business software solution. Developed specifically for MRO and logistics organizations it promotes best practice and improves business processes with one integrated solution running on one database that can be flexibly deployed as a dedicated in-house system, or be hosted via a third-party cloud. Quantum Control's personalized configuration settings provide individual users with an intuitive interface which improves the bottom line through optimized productivity. As a powerful, affordable and scalable solution, Quantum Control extends across the supply chain using its built-in web services fully integrated with [www.StockMarket.aero](http://www.StockMarket.aero).

### **About QUE Group**

The QUE Group is a [user managed, nonprofit corporation](#) that is independent from Component Control, and supported by a membership website with online community. Built to facilitate networking and information sharing across companies that use Quantum Control software, The QUE Group is governed by a Board of Directors comprised of elected members of the community. For more information, or to become a member, visit [www.quegroup.org](http://www.quegroup.org).

### **About Component Control**

Component Control, based in San Diego, Calif., is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry. Its core product, Quantum Control, provides advanced aviation management support to original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution / redistribution companies. Quantum is installed in over 50 countries and can be deployed as a single-site or multinational solution.

Stockmarket.aero, also from Component Control, is an online aviation parts trading marketplace giving users access to a comprehensive search engine that includes parts in stock, MRO capabilities and part alternatives. StockMarket.aero currently lists over 100 million qualified line items of inventory and capability from over 3,000 aircraft parts vendors.
