

Quantum Control User Group, QUE Group, Launches Innovative Website

SAN DIEGO, CA, June 15, 2016 - Quantum User Exchange Group, or the QUE Group, announces the launch of their new innovative website.

The QUE Group's 2016 board has read, listened and assembled the new site based on past surveys and suggestions from the QUE Group user community.

The website offers an online forum for users of Quantum software to facilitate discussions on the various aspects of the Quantum application. Users share strategic approaches and recommendations on how their business uses Quantum. Users can search the forums by using 'keywords', this enables a user to read past discussions on topics they might presently be dealing with.

The website's theme of "Great Minds Think Alike" energizes the new look focused on increasing awareness, understanding Quantum functionality, and providing support resources to deliver additional benefits to our members. The new site offers sponsorship opportunities which provide additional brand exposure for your organization with banners and logo placement. The site works as a great online networking resource and displays past and upcoming information on the annual QUE Group Conference event.

QUE Group is committed to making a difference and to serve as the voice of the user community to Component Control by increasing enhancements to the application and overall functionality; ultimately improving the application's success for all users.

"With this new website, we hope to provide a resource where individuals can learn more about various module functionality and solutions for daily challenges, and offer a way for people to give back to support this very worthwhile cause. We are different and by transforming our contacts list into a customer engagement center we are providing our members with an effective solution tool for our relationship business community" explains Joyce Cornett, QUE Group Secretary & Board Member.

"The goal of the website is to provide visitors with clear and accurate product and service information, demonstrate our expertise in business and technology solutions, and help users navigate in this confusing world of technologies through our newly designed forum website."

About QUE Group

The QUE Group is a user-managed, non-profit corporation that is independent from Component Control, and supported by a membership website and online community. Built to facilitate networking and information sharing across companies that use Quantum Control™ software, The QUE Group is governed by a Board of Directors comprised of elected members of the community. For more information or to become a member visit the QUE Group website.

About Component Control

Component Control, based in San Diego, California, is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry. Its core product, Quantum Control, provides advanced aviation management support to original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution/redistribution companies. Quantum is installed in more than 50 countries and can be deployed as a single-site or multinational solution.

Stockmarket.aero, also from Component Control, is an online aviation parts trading marketplace giving users access to a comprehensive search engine that includes parts in stock, MRO capabilities and part alternatives. StockMarket.aero currently lists more than 100 million qualified line items of inventory and capability from over 3,000 aircraft parts vendors.

Component Control won the 'Best IT Software Provider' category in the Aircraft Technology Engineering and Maintenance Awards.
